

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Recently retired, after spending many years working with his brother to assemble their crane company into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

During their trip, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable market for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other construction functions.

After returning from their vacation, John set up a joint venture with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different international markets and continues to develop contemporary machinery to guarantee that customers are able to become safer and more efficient within their workplace.
